

**NO RUST
NO GREASE
NO FOOLING**

RIDE UNCHAINED

Your bicycle is equipped with a Gates Carbon Drive belt system instead of chain. Each belt contains carbon cord – avoid the handling errors noted on the flip side to prolong the life of your belt.

Gates Carbon Drive replaces greasy and dirty chains with a carbon fiber reinforced belt that never rusts, never stretches, and never needs lubrication. By reducing bike maintenance, Gates Carbon Drive makes it easier for people to ride more with less hassle.

Read this information and the entire Gates Carbon Drive Owner's Manual (available at the link below) before using, replacing, or installing the Gates Carbon Drive belt. Improper installation, adjustment, alteration, service, or maintenance can result in property damage and serious bodily injury, including death. Refer to the Gates Carbon Drive Owner's Manual for assistance or consult with a cycling professional for further information. Gates requires a hand brake as the primary braking system.

HANDLING THE BELT

Do not crimp, twist, invert, backbend, bundle or zip tie the belt. Do not use the belt as a strap wrench or chainwhip. Do not roll on or pry on the belt.
